### ABSTRACT

Identifying signs of socialization in children aged 5-6 years is important for understanding their social development and providing appropriate support. The purpose of this study is to study effective methods for identifying signs of socialization in young children through educational games. Observation and analysis of children's behavior during such games allow us to determine various indicators of socialization, including interaction with peers, cooperative play, effective communication, conflict resolution skills, empathy, social initiative, and leadership skills. Teachers and parents can use these indicators to assess children's social skills and tailor interventions to support their social development. Integrating educational games into the assessment process promotes a more holistic understanding of children's socialization, leading to improved interventions and outcomes for their social development.

5-6 yoshli bolalarda sotsializatsiya belgilarini aniqlash ularning ijtimoiy rivojlanishini tushunish va tegishli yordam ko'rsatish uchun muhimdir. Ushbu tadqiqot o'quv o'yinlaridan foydalangan holda yosh bolalarda sotsializatsiya belgilarini aniqlashning samarali usullarini o'rganishga qaratilgan. O'quv o'yinlari davomida bolalarning xatti-harakatlarini kuzatish va tahlil qilish orqali ijtimoiylashuvning turli ko'rsatkichlarini

aniqlash mumkin. Ushbu ko'rsatkichlar tengdoshlarning o'zaro ta'siri, hamkorlikdagi o'yin, samarali muloqot, nizolarni hal qilish qobiliyatlari, empatiya, ijtimoiy tashabbus va yetakchilik qobiliyatlarini o'z ichiga oladi. O'qituvchilar va ota-onalar ushbu ko'rsatkichlardan bolalarning ijtimoiy ko'nikmalarini baholash va ularning ijtimoiy rivojlanishini qo'llab-quvvatlashga qaratilgan tadbirlarni sozlash uchun foydalanishlari mumkin. Ta'lim o'yinlarini baholashga integratsiyalashgan holda, bolalarning ijtimoiylashuvini yanada yaxlit tushunishga erishish mumkin, bu esa yosh bolalarning ijtimoiy rivojlanishi uchun yaxshilangan aralashuv va natijalarga olib keladi.
